

The image shows a technical drawing of a cross-section. A vertical line on the left side represents a boundary. A horizontal line runs across the middle of the drawing. Below this horizontal line, there is a curved profile that starts flat on the left and curves downwards on the right. At the far right end of this profile, there is a detailed view of a curved component, possibly a pipe or a duct, with a flange-like structure. The labels 'FT 1' and 'FT 2' are positioned at the bottom left of the drawing.

FT 1
